Program Description:

Magnet students will cultivate an understanding of communities around the world through research and exploration of people and their cultures. Students will engage in an academic-rich multiculturalism program, fostering an appreciation of how an individual can contribute to the world. Students will be purposeful in building an awareness of how citizens work together to create a network of collaboration, both locally and globally. Technology will contribute to student learning, allowing individuals in the magnet program to communicate faster, collaborate with ease, and contribute to society at a global level. Coursework moves at an enriched and accelerated pace that is one to two grade levels above in terms of breadth and/or depth where additional curricular materials are used and implemented by the magnet classrooms, including lessons in Spanish. Students are expected to complete summer assignments, which “frontload” content and allow magnet teachers to increase the depth of unit exploration throughout the school year.

Fast Facts:

1. Technology: Interactive whiteboards, Robotics, Programming
2. STEAM integration based on real-world problems (world hunger, clean water)
3. Community garden and campus wetlands host outdoor learning spaces
4. Opportunities to communicate & collaborate with students in various countries
5. Partnerships with colleges & community agencies supporting Global Citizenship themes

Application Deadline: March 1, 2019
